

SATELLITE CLINICS IN THE COMMUNITY

Some satellite clinics do not offer 1st antenatal visits (booking visits). When this is the case you will need to book and attend your 1st visit in another satellite clinic or in NMH outpatient's department. The team can then transfer your care to your chosen satellite clinic for the remainder of your pregnancy.

There are two visit types:

First visits/booking visits: This is your first antenatal appointment. This visit is a longer appointment as we take a full history, carry out some tests and talk to you about your health and pregnancy among other things.

Return visits: A return visit is the term used to describe every antenatal visit with us after your first visit and is usually shorter.

Satellite Clinic	Location	Day	Clinic Time	Midwife Led Clinic	Consultant Led Clinic	Visit Type
